VOYAGER MARITIME ALLIANCE GROUP

THE VMAG DIFFERENCE

From the latest in marine security systems, to the most advanced navigation and audio/visual equipment, Voyager Maritime Alliance Group provides the ultimate in performance and control for your vessel.

Located in Fort Lauderdale Florida, Voyager Maritime Alliance Group, is the marine industry's one-stop shop for marine electronic, navigation and communication systems. From basic marine navigation systems to fully integrated vessel management and control systems, Voyager Maritime Alliance Group uses cutting-edge technology from the very best equipment manufacturers world-wide in order to deliver the ultimate control and peak performance for your vessel.

President's Message

In the highly competitive world of marine technology, when owners and captains demand only the very best in terms of products and services, expertise, reliability and all round customer care, I'm excited to be celebrating VMAG's 20 year anniversary.

For these two decades, the business has grown stronger and stronger, increasing our customer base and revenue ongoing, supported by my team of seasoned marine and IT professionals, resulting in increased customer loyalty.

I invite you to take a closer look at VMAG...you won't be disappointed.

Regards,
David Leone

WE MAKE IT EASY

We work with multiple suppliers, integrating numerous pieces of equipment, and interfacing everything with reliable software.

WE SAVE YOU MONEY

Having developed strong, long-term relationships with many suppliers, allows us to pass along significant savings to you. We will help you determine which installation best meets your needs for your specific vessel and operations. So many companies offer the "best system" but very few take the time to evaluate and define the "best solution".

WE GIVE YOU ULTIMTE CONTROL

The variety of marine electronics equipment available on the market today, along with the multitude of possible configurations is overwhelming. That's where we come in – Voyager Maritime Alliance Group works with you to decide which components and options are the best choices for your vessel.

At sea, staying connected is critical

COMMUNICATIONS

Designing and installing custom, integrated, vessel management systems. We can develop a complete turnkey system, including equipment, configuration, installation and support for your networking environment.

Broadband Internet

The most cost effective way for a vessel to communicate via phone, Internet, or fax and work with some of the smallest communications products in the marine industry today.

VOIP & PBX Communication

Built-in Network Management Simplifies Onboard Life and is Perfect for World Voyaging Yachts, Seamless Coverage and Easy Onboard Networking from Global Dual-mode Antenna System

Email & Internet

We integrate robust systems, providing mariners constant, reliable, simultaneous access to voice and high-speed Internet services on a global basis.

Ship to Shore

Our answer to market needs is a broadband network infrastructure onboard the vessels, bringing ship-to-shore operational and social communications to the broadband IP era.

The heart and soul of sea-faring life

NAVIGATION

Our core competencies include custom bridge equipment design, manufacturing, installation and commissioning of complete bridge systems. Our utilized products continue to deliver the ultimate in both performance and reliability.

Navigation Systems

VMAG works diligently to sort through the plethora of navigational equipment on the market today to design a custom system that fits the vessels type of travel.

Shipboard Monitoring

With cast aluminium, compact and sleek by design chassis, the units from this new range can be desk mount or console integrated. We are committed to the application of technology so that we provide only the highest quality marine displays and computers.

Radar & Tracking Integration

Tracking technology allows you to identify vessel, speed, bearing, closest point of approach (CPA) and time to closest point of approach (TCPA), dangerous/proximity alarms, overlay AIS info for further target clarification.

The vital ingredient for you on-board guests

ENTERTAINMENT

All of us at Voyager Maritime Alliance Group are sticklers regarding maritime electronics and security. However, when it comes to entertainment systems... our passion is contagious. We have partnered with the world's leading players in marine entertainment all under one roof and can deliver any configuration to satisfy your specific needs.

Kaleidescape Entertainment

To ensure seamless integration into even the most sophisticated viewing environments, the Kaleidescape System fluently communicates with all popular automation and control systems.

Crestron Control System

After years of pioneering digital media technology, Crestron continues to advance the only complete end-to-end digital network solution.

Marine Theater Systems

Experience the breakthrough in maritime satellite TV design, bringing high-definition programming from DIRECTV® in the same way as you enjoy at home.

Shipboard Music Server

With the ability to import CDs along with Blue-Ray Discs and DVDs, the Kaleidescape System enables you to enjoy your music collection with all of the flexibility, quality and convenience.

Phone & Tablet Integration

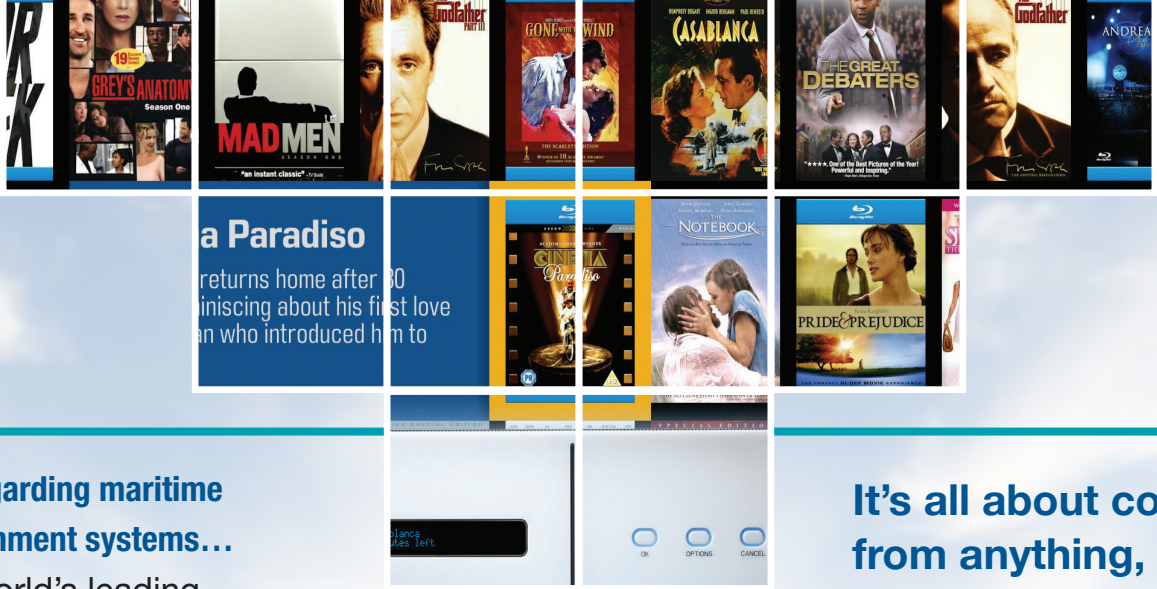

Simply enable wireless streaming on the displays and then enable the Wi-Fi network on your Android or iOS device.

Touchpanel Control

There are a variety of touchpanels available. Sleek and beautifully designed for easy control, the latest touchpanels are unmatched in performance and quality.

HD Satellite Television

Satellite TV antennas bring the same combination of high performance and ease-of-use to your onboard entertainment that you would expect from your home entertainment system.

It's all about control

MONITORING

It's all about control. And when you are at sea miles from anything, you better have it. **NEXT Generation Wireless Security & Monitoring head unit with built in quad band GPRS/GSM.**

Monitoring and Control

- Monitors: Integrated flat panels, Integration to TV distribution systems to allow visual on all TV's.
- All systems can be controlled from one central location
- Control may be designated to multiple locations
- Select locations can have restricted control
- Mirrored system for backup

Fire Monitoring

Fire System monitoring provides protection against smoke, dangerous fumes as well as fire by audible notification of affected area.

Systems for Integration

Integrated systems can be installed which monitor and control all ships systems. Here's just a few:

- | | |
|--|--|
| • Tank & Bilge Levels | • Security Zones |
| • Engines & Generators | • Lighting |
| • Switchboard control, load shedding and load monitoring | • Hatches & Doors |
| • Clutches & Gearboxes | • Pumps |
| • Thrusters | • Electrical Distribution |
| | • Air Conditioning and refrigeration systems |

Fuel Usage Monitoring

Fuel monitoring and analyzing systems operate in a full automatic mode, "day & night".

Bilge Monitoring

Bilge Level Monitoring monitors high water bilge sensors to detect fluid levels in all bilge and cofferdams.

We have your back, 24/7

SECURITY AND CAMERAS

Camera Systems

Voyager Maritime Alliance Group provides end-to-end enterprise IP video and alarm management systems.

Recorders

Discover the marine industry's most innovative video recording solutions! Record multiple real-time camera feeds simultaneously with secure, tamper-proof software with date and time stamping.

IP Cameras with Remote Access

Remote access is often a key factor when choosing a security camera. Our systems help protect against theft, fire, smoke, high water in the bilge, low voltage, loss of shore power and intrusion with contact sensors, motion detectors, infrared beam sensors, deck sensors, dock pull away sensors and many more.

Wireless Security

GOST Phantom Boat Alarms and Vessel Monitoring Systems are all in one wireless boat alarm systems that combine high security and yacht tracking applications with ease of use and unique consumer features including a designer look you would never associate with boat security.

Vessel Tracking

Our vessel tracking solutions alert owners in the event of high water in the bilge, low battery voltage, loss of shore power, smoke or intrusion on the vessel. Wireless relays can be added to control any AC or DC powered devices onboard with a key fob or remotely over the phone.

From simple to very complex needs

BUSINESS DEVELOPMENT

At the heart of VMAG’s business is its loyal, knowledgeable and dedicated staff. All of VMAGs’ technical staff undergoes regular training, to make sure that they are kept up-to-date with the latest technology and new products.

Initially, VMAG focuses on seamless integration, no matter how many different manufacturing partners are involved in the equation. With so many different components, a seamless and timely integration is vital, BUT that’s only half the story.

- With so much intricate technology, you need a company to support your ships infrastructure every step of the way.
- Quick and rapid responses when situations arise.
- Pro-actively monitoring your existing systems and introducing new product features, when they come to market, that can provide you with additional value.
- Highly technical VMAG staff who are always available to review, analyze and recommend improvements in such areas as efficiency, safety and reliability that exceed owner’s expectations.

This is what makes VMAG stand out from the rest and maintain its reputation as one of the most respected marine technology integrators in the world.

All points of the globe; we have you covered

GLOBAL COVERAGE

Wherever you are in the world, on-shore or at sea, VMAG is never far away. We have strong relationships with most of the major players in the industry who have significant global reach and as a result, VMAG is able to provide superior service and pricing to our clients, as well as customized solutions based on specific needs.

During VMAG’s first 20 years, we have been instrumental in integrating numerous marine technology installations into vessels worldwide and our name and reputation is testimony of our high standards of delivery and support.

SUPPORTING GOOD CAUSES

VMAG is a big supporter of giving back to those in need. We are involved in Wounded Warrior Projects, both locally and nationally. The charity serves military personnel who have been injured in the line of duty, many of whom have lost limbs.

But it’s not simply financial contributions. As an example, VMAG is donating electronics and systems integration services for a Port Everglades-based boat which will take wounded veterans out to sea for recreation and rehabilitation.

Additionally, VMAG supports the local league of U.S. Naval Sea Cadet Corps.
