

Friendly, prompt, punctual and great service. Ask for some unique preparations and they have the ability to customize patient friendly preparations and packaging that meets our requirements. We would recommend Park to any Veterinarian Hospital or Clinic.

Gary Tateyama, D.V.M.
Yorba Regional Animal Hospital

Park continue to be an in-valuable resource for our company. At the hospital, we excel at amazing customer service, and our clients come to depend upon us for their specific needs. We know that Park believes in this same philosophy. We have come to rely on many of their in-genius pharmacists to research and recommend the best solutions.

Jeffry Glass D.V.M.
Stonecreek Animal Hospital

Have been using Park since 1999 for all my patient's compounding needs, without ever having a problem. The medications have always met my expectation standards. I do not use any other compounding pharmacy as quality and care for may patients is something I will not compromise!

NOW there's a *total solution* for
CUSTOMIZED DOSAGE FORMS
 of **Veterinary medications** and
 the **DELIVERY OPTIONS** for
 each animal and condition treated

- Customize dosages and strengths of medications
- Add flavoring to medications to make them more palatable
- Create alternate dosage forms and delivery options
- Compound discontinued or hard to find medications

There are millions of pet owners in America who lovingly share their lives with their special animal pets.

→ **Park Compounding** will work caringly and closely with each Veterinarian to formulate ways to make medications that appeal and recommend the best delivery option.

Each pet may have unique medication requirements not offered by U.S. pharmaceutical manufacturers.

→ **Park Compounding** will prepare the Veterinary prescription and tailor the strength, dosage form, and flavor to each animal's needs.

As any Veterinarian and pet owner is well aware, animals can be extremely difficult to treat with medications.

→ **Park Compounding** highly trained staff of Pharmacists and Technicians can offer many compounded options for all animals

Since 1996, Park Compounding, located in Irvine, California, has been formulating customized Veterinary dosages and methods of administration to meet the unique needs of all family pets.

The close relationship with each Veterinarian, Pharmacist and pet owner is the foundation of Park Compounding's specialized compounded Veterinary preparations.

Unique Veterinary Compounds Can Make All The Difference
